

Merge Sort algorithm

Implement Merge algorithm to sort an integer array in ascending order, and try to make it as fast as possible.

- Comment Your Name And Registration Number As The First Line In The Code
- You are prohibited from using the built in functions of any language
- **Your Code will be Reviewed to prevent any cheating**

Input Format

- First line:the size of the array
- Second line:the array to be sorted(numbers seperated by spaces)

Constraints

-

Output Format

output between two brackets and each number seperated by a coma.

Sample Input

- 6
- 1 9 3 5 4 7

Sample Output

[1,3,4,5,7,9]

Explanation

sort array in an ascending order.
