

Merge Sort algorithm

Implement Merge algorithm to sort an integer array in ascending order, and try to make it as fast as possible. Your algorithm is not allowed to allocate new arrays like the conventional Mergesort. It must performane its work on the same array

- Comment Your Name And Registration Number As The First Line In The Code
- You are prohibited form using the built in functions of any language
- **Your Code will be Reviewed to prevent any cheating**

Input Format

- First line:the size of the array
- Second line:the array to be sorted(numbers seperated by spaces)

Constraints

No Constraints

Output Format

output between two brackets and each number seperated by a coma.
